Professional Summary

B.Tech (Honors) Mechatronics Engineering student with a Minor in IoT and hands-on experience in embedded systems, robotics, industrial automation, electromechanical prototyping, and manufacturing. Built Arduino- and ESP32-based robotics and automation projects and gained industrial exposure through relay production and Industry 4.0 training. Seeking internships in robotics, automation, embedded systems, IoT, and related engineering roles.

Education

B.Tech (Honors) in Mechatronics Engineering, Minor in IoT

2024–2028

Jyothi Engineering College, Cheruthuruthy, Thrissur

CGPA: 7.6/10

Technical Skills

Programming: C, Python | **Microcontrollers & Platforms:** Arduino, ESP32, STM32

Engineering Software: MATLAB, Fusion 360, KiCad

Robotics & Automation: Industrial Automation, Sensors, Actuators, Motor Control

IoT & AI: IoT Protocols, Edge AI

Experience

Production Intern

8 June–22 June 2026

SFO Technologies Pvt. Ltd. – Transformers and Inductors Division

- Supported assembly and production of electromagnetic relays used in smart energy meters.
- Performed actuator spring insertion, component fitting, assembly of brass components with fixed copper blades, and terminal pin adjustment.
- Worked with current transformer (CT) components and performed continuity and strength checks across single-phase, three-phase, and neutral relay variants.

Industry 4.0 Intern

23 June–1 July 2025

TATA JYOTHI IIIC, Jyothi Engineering College

- Completed hands-on training in embedded systems, robotics, industrial automation, CNC machining, and automotive systems.
- Explored practical Industry 4.0 applications across engineering and manufacturing domains.

Projects

Gesture-Controlled Robot

ESP32 / MPU6050 / L298N

- Built a gesture-controlled mobile robot using an ESP32, MPU6050 IMU, and L298N motor driver; implemented motion control using accelerometer and gyroscope data.

Automated Irrigation System

Arduino / Soil Moisture Sensor / Tinkercad

- Designed and simulated an Arduino-based irrigation system with soil moisture sensing, automatic watering, and visual status indication.

Motion-Activated Hand Dryer

PIR Sensor / Transistor Switching

- Developed and implemented a PIR-based automatic hand dryer using a transistor switching circuit for sensor-driven operation.

Multipurpose 3D-Printed Paperweight

Fusion 360 / 3D Printing

- Designed and fabricated a multifunctional product integrating a paperweight, phone stand, and pen holder using Fusion 360 and 3D printing.

Certifications & Technical Training

- Hands-On Edge AI Workshop** – DigiToad Technologies Pvt. Ltd. in collaboration with STMicroelectronics, 2026
- MATLAB for Scientific Computing and Network Analysis** – CoreRel Technologies, 2025
- MATLAB Essentials: From Concepts to Simulation** – IEEE PELS SBC JECC, 2026

Leadership & Activities

- IEEE WIE AG JECC** – Executive Committee Member
- IEEE SPS SBC JECC** – Executive Committee Member
- NSS Volunteer** – Unit 542 (2022–2024) & Unit 140 (2025–Present)

Hackathons & Competitions

- 1st Place – Real World Solutions Ideathon, Techletics 4.0** – Christ College of Engineering 2026
- NASA International Space Apps Challenge** – Participant 2024 and 2025
- ISRO Hackathon** – Participant 2025
- YIP Hackathon** – Participant 2025
